

# Bibliometrics using Scopus

For Support: contact [Faculty Librarians](#) OR [Research Support Librarian](#)

# Author search

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation. If insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are

Documents **Authors** Affiliations Advanced

## This author's *h-index* is 20

The *h-index* is based upon the number of documents and number of citations.

Note: Scopus is in progress of updating pre-1996 cited references going back to 1970. The *h-index* might increase over time.
